

Simply having a backup power system is not enough. You need to be certain your backup system will work every time you need it.

BTECH's NEVERFAILSM Partnership provides that certainty. BTECH's Unique Impedance Monitoring Technology is your early warning system that works around the clock to warn you at the first sign of battery problems. Our system detects deteriorating backup batteries using continuous, real-time monitoring to measure key performance indicators. You replace only the deteriorating batteries *before* they become a problem, not all of your batteries.

NEVERFAILSM reduces your risk of catastrophic failure to near zero... and helps you:

- Avoid Lost Revenue
- Save Expense
- Gain Peace of Mind
- Ensure Ultimate Critical Power Reliability

Most of All, NEVERFAILSM is a partnership between you and BTECH. It's a comprehensive program to ensure the integrity of your backup batteries so vital to your backup power system.

Whether you depend on 2, 20, 20,000 backup batteries, **NEVERFAILSM** is the solution for you. Our program includes these three critical elements:

1. On-site battery monitoring;
2. Remote "around-the-clock" alarm/data collection and analysis by BTECH experts;
3. Priority Service and technical support, including regular on-site inspections and preventative maintenance.

BTECH takes the blind spot out of your backup batteries so you can have peace of mind knowing that your backup systems will work when you need them - every time.

Testimonial

"My department is responsible for ensuring the operation of vital facilities at the hospital. To avoid the impact of devastating blackouts, we employ the use of Backup Power Supply Systems. Since backup power systems rely on backup batteries, which can fail with no notice, we employ BTECH Battery Monitoring Systems. BTECH identifies any developing battery problems that otherwise would go undetected. In this way we can proactively make needed battery substitutions and drastically reduce our risk of experiencing a power outage."

Mr. Darayes Bharda
Technical Supervisor
Robert Wood Johnson University Hospital
New Brunswick, New Jersey

NEVERFAILSM is the result of BTECH's 14 years' experience and more than 3,000 installations worldwide. We hold patents to the key battery monitoring technologies that produce consistent, reliable data from virtually every battery type and manufacturer.

You'll find our systems where critical backup power is needed most, including:

- Government agencies;
- Military installations;
- Public utilities;
- Fortune 500 multinationals;
- Business enterprises in every industry and on every continent.
